Other specified risk

The following risk are essential to this Fund and are not (sufficiently) reflected by the indicator:

• **Credit Risk:** The Sub-Fund invests in high quality short term money market instruments. Despite the fact that these instruments are deemed by the portfolio manager to be of high creditworthiness, the risk remains that one or more of these instruments fail to repay principal, in which case the participations in the Sub-Fund may lose value.

• **Interest Rate Risk:** The Sub-Fund invests in short term liquid money market instruments, the return of which is highly dependent on short term interest rates. In case of a sharp rise in short term interest rates, participations in the Sub-Fund may lose value.
