## WHAT IS THIS PRODUCT?

### TYPE

The **FundShare UCITS Post Opbouw Inkomens Fonds (ISIN: NL0015000NC8)** ("Sub-Fund") is an open-ended sub-fund of the investment fund FundShare, an undertaking in collective investment in securities (UCITS) as defined by the Act on Financial Supervision (Wft), founded as a mutual fund ("fonds voor gemene rekening") under Dutch law.

### OBJECTIVES

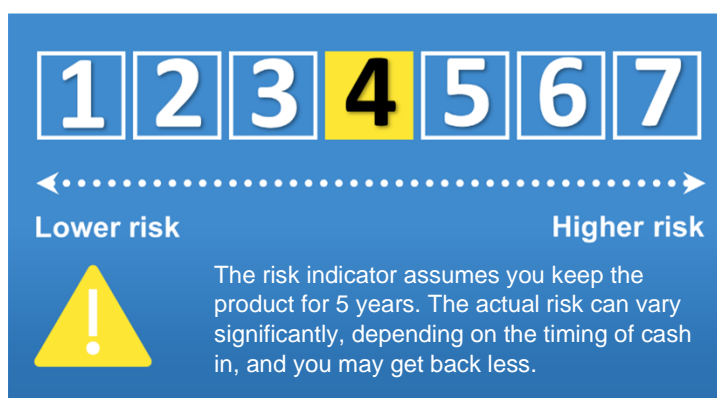

The FundShare Post Opbouw Inkomens Fonds is an actively managed investment fund, and its objective is to offer investors stable wealth growth. The core of the portfolio consists of investment grade bonds and stocks, which can be achieved by investing in ETF's. The Sub-Fund will invest a minimum of 60% in equity securities. Up to 40% of the Sub-Fund will be invested in bonds. The main factor affecting the return of the Sub-Fund is the performance of the stocks in the portfolio. The return and risk profile of the sub-fund for the recommended holding period of 5 years is striving to be comparable with a mix of 75% MSCI World Equity index and 25% EUR Overnight rate.

### INTENDED RETAIL INVESTOR

Basic investors with basic knowledge of the financial markets, who can make an informed investment decision based on the regulated and authorized offering documentation, and who seek Capital Growth in the recommended holding period of 5 years and can bear capital loss. The Sub-Fund is suited to a first-time investor with no financial industry experience.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### RISK INDICATOR

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, while poor market conditions will not impact our capacity to pay you.
- This product does not include any capital guarantee or protection, meaning that you could lose some or all of your investment under unfavorable market conditions.
- The following risks are essential for this Sub-Fund and could be not sufficiently reflected by the indicator.

- **Market Risk:**
- The Sub-Fund is subject to equity market risk. It's the risk that movements in the market - equity price - will cause the fair value of financial instruments to fluctuate and can affect the Sub-Fund's value of its portfolio.
- **Currency Risk:**
- The Sub-Fund is subject to currency rate (foreign exchange rate) risk on securities held for investing and on cash that is denominated in a currency other than the base currency. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio.
- **Interest Rate Risk:**
- The Sub-Fund invests in fixed income instruments (bonds). Depending on the remaining term of the bond, an increase in interest rates can have a negative effect on the value of a bond. The longer the time to maturity, the greater the fall in value in the event of rising interest rates.

## PERFORMANCE SCENARIOS

- This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest EUR 10 000.
- The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.
- The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.
- The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.
- The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## WHAT HAPPENS IF FUNDSHARE FUND MANAGEMENT B.V. CAN NOT PAY OUT?

The assets and liabilities of the Manager and the various sub-funds are administratively segregated from each other. The legal custody is in the name of Legal Owner FundShare UCITS Umbrella ("Legal Owner"). As a result, the retail investor will **not** face a financial loss due to the default of FundShare Fund Management B.V. ("Manager"). The depositary of the Sub-Fund is Caceis. They are responsible if all assets of the Sub-Fund are in custody.

## WHAT ARE THE COSTS?

### COSTS OVER TIME

The Reduction in Yield (“RIY”) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest EUR 10 000. The figures are estimates and may change in the future.

Investment EUR 10 000			
Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years
<b>Total costs</b>	180 EUR	540 EUR	900 EUR
<b>Impact on return (RIY) per year</b>	1.80%	1.80%	1.80%

### COMPOSITION OF COSTS

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories

This table shows the impact on return each year.			
<b>One-off costs</b>	Entry costs	0%	We do not charge any entry fees for this product.
	Exit costs	0%	We do not charge any exit fees for this product.
<b>Ongoing costs</b>	Portfolio transaction costs	0.3%	The impact of the costs of buying and selling underlying investments for the product by the Manager.
	Other ongoing costs	1.50%	The impact of the costs that we take each year for managing your investments and the costs presented in Section II.
<b>Incidental costs</b>	Performance Fees	0%	We do not charge any performance fees for this product.

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

### RECOMMENDED HOLDING PERIOD: 5 YEARS

Disinvestment is possible each business day free of charge. The recommended holding period is 5 years based on the investment objective of the Sub-Fund. A longer holding period generates greater returns in general. Cashing-in early may realize higher risk and lower return.
